

Help us give healthier, happier lives to children with facial disabilities

- In Ethiopia, one child in every 600 is born with a cleft lip and/or palate. Many others are affected by serious injuries and illnesses, such as burns, animal attacks, tumours and noma—a devastating facial infection.
- As well as daily communication and physical problems, these children confront great social stigma. They might be rejected by their communities, denied the right to education or even abandoned to become streetchildren.
- Free treatment is available in the capital city. However, for a coffee farmer in a rural town like Harar, the cost of taking your child to see a surgeon or qualified dentist is equal to your entire annual income.

Thanks to Project Harar, children like Shige (pictured with her Dad before and after the operation) have the opportunity to access the surgical and dental care that can radically change their lives.

Project Harar aims to secure treatment and follow-up care for over 500 young patients in 2011. Help us bring down the barriers caused by poverty and isolation, allowing these children to reach proper surgical care.

How your support counts

It costs on average **£300** to treat a patient from start to finish, including the many needing complex or secondary operations.

- **£10** pays for x-rays, tests and medicine for a child.
- Just **£50** per day provides for advanced surgery and intensive care.
- With **£200** our fieldworkers can cover an area of more than 1,000 km, informing families and registering young patients.

Baby Gadisa's cleft lip runs in the family — it was corrected last summer along with his sister's and father's. Project Harar has now found surgeons, speech therapists and dental experts for his cleft palate.

We desperately need resources to bring other infants for treatment before it's too late to avoid longer-term problems.

Project Harar Ethiopia

WHAT PROJECT HARAR ETHIOPIA DOES

Since 2002, Project Harar has been securing life-changing medical care for children and young people with severe facial disabilities living in some of the poorest and most isolated regions of eastern Ethiopia.

Without Project Harar, many hundreds of children would continue to lead 'hidden' existences, unable to speak or eat normally and denied a place at school.

With our medical partners, we aim to give back proper facial function and good appearance to our young patients – and with that, their independence and dignity. Moreover they can look forward to being fully included in their home community.

Hawa received follow-up surgery to minimise the consequences of noma — a devastating facial infection.

As well as eating and drinking normally, Hawa now speaks and smiles with confidence.

So many ways to support us

Standing orders and direct debits

Standing orders and direct debits are the most effective way to help.

Use the form above to set up a Standing Order or visit the 'Get involved' page at

100% of your donation will go direct to our projects for children in Ethiopia.

Make Project Harar your next challenge

Running the marathon? Skydiving for the first time? Or willing to shave your head for charity?

Whatever the challenge you want to take, there could be a great opportunity to fundraise for us. We'd love to hear from you if you're thinking about it.

Get in touch if you are interested in taking part in the **British 10K London Run** in July 2011; a great day out and a fantastic way to raise funds for Project Harar.

Recycle your ink cartridges and mobiles with Each One Counts

Support Project Harar's efforts in Ethiopia and help the environment at the same time.

Order your Freepost Recycling Bag from www.eachonecounts.co.uk/projectharar. Proceeds go to the charity's work.
